RE: Badger Meter Extended Lead Times

Dear Mrs. Mahoney:

Badger Meter is dedicated to serving the Monroe Municipal Utilities Authority and would like to take this opportunity to address the extended lead times currently imposed. During the last few years, supply chains have been tested and many suppliers have not even had product to deliver. Badger Meter has consistently delivered product through these challenging times and has taken steps to ensure all our customers' orders are fulfilled.

Badger Meter is a leading provider of solutions in the water industry. Founded in 1905, Badger Meter has decades of experience providing best-in-class solutions and has proven success navigating challenging economic times.

To compensate for supply chain troubles, Badger Meter has had to extend lead times for certain products with difficult to obtain materials but is dedicated to working with the Authority to ensure product is delivered and adjust forecasting as necessary to mitigate the impact.

We appreciate the opportunity to support your metering needs.

Sincerely,
Badger Meter, Inc.
